South African Students Liked Montreal Visit

Spent Afternoon Skiing And Tobogganing

NEXT STAY BOSTON

Engineer Graduate Tells Of Diamond Diggings And Outlook

An Appreciation

The South African students wish to thank McGill for the splendid time and warm welcome with which they were met during their all too short visit to Montreal. The visit was indeed a memorable one; the friendliness and goodfellowship of the students made the visit very happy, and all will carry away a lasting impression of students who like themselves are members of the British Commonwealth of Nations.

They hope to reciprocate very soon when a group of Canadian students shall see and know South Africa.

Margery I. Myers.

Bound for a two days' stay in Boston, the party of 37 South African students which has been visiting Montreal for the past two days left the Windsor Station at 9.15 last evening. They spent yesterday afternoon at the Park Tobaggan Slide, the guests of the Tobaggan Club, and enjoyed a taste of Canadian Winter sports by trying sliding and ski-ing. They concluded the afternoon by a vigourous walk back to the McGill Union where they had supper before their train.

In commenting on the visit, D. R. McMaster, president of the Scarlet Key Society which acted as host to the party during their stay, made the following statement: "We have enjoyed having our South African guests extremely, and sincerely hope they will have a bon voyage home, and will come to visit us again."

"There are probably more cowboy hats in the diamond diggings of South Africa than in the whole of America," said R. J. Watson, one of the graduate students among the party. Mr. Watson is a graduate of the engineering branch of Natal University College situated in Durban. The diggings are virtually a continuous town 50 miles long, he explained. Over 200,000 men are engaged in the various phases of diamond mining.

The rushes that take place when a new section is opened up were explained. In the most recent of these, that at Grasfontein, over 25,000 men toed the mark waiting for the lower-

Meds Meet on Monday

Dr. Burgess Will Speak Concerning Medical Education

The idea that Medical Education has not yet reached its proper point is contained in the subject on which Dr. Burgess will talk on at the meeting of the Medical Undergrads next Monday. Dr. Burgess subject is "Medical Education, its Mistakes and its Possibilities."

Dr. Burgess is a well known figure around the Medical Faculty and the hospitals of the city, and is recognized as a speaker of ability.

Case reports will be presented as usual, with the understanding pointed out that at the beginning of the year that the early part of the discussion would not be open to fifth-year men, it being considered that there is too much of a tendency for them to monopolize the discussion under these circumstances.

Newfoundland Club

Members of the Newfoundland Club and any other Newfoundland students at McGill will have the privilege and honour of being entertained at luncheon with the premier of their state, The premier Sir Richard Squires will be their host at the Mount Royal Hotel today at 1 p.m. All Newfoundland students are invited.

R.V.C. Ski Club.

There will be a meeting of the R.V.C. Ski Club on Sunday morning near the Park Slide on Mount Royal. Will the members who intend to come please get there between 10.30 and 11 a.m.

Acting Principal's Brother Will Address Forum

Alfred W. Martin, brother of Acting-Principal Martin, will be the speaker at the weekly meeting of the People's Forum in the Church of the Messiah tomorrow evening. His subject wil be "The Ethics of Non-Resistance".

Mr. Martin is a native of Montreal and a graduate of McGill. He is well-known in the city and is a member of the congregation of the Church of the Science. A popular speaker, he has lectured widely, both in many principale American cities and in Europe. Mr. Martin comes back to speak in his native city and in the Church with which he has been so long associated upon many requests from those who know his ability.

The speaker is the leader of the Ethical Culture Society of New York. His subject, "The Ethics of Non-Resistance", deals with the non-resistance to evil. Mr. Martin believes that it is contrary to Christ's teachings to oppose or punish evil, and rence, that our entire social fabric is raised on those very principals which Jesus repudiated. Although unorthodox in his beliefs, Mr. Martin is not radical.

Maccabaeans In Strathcona Hall

Rabbi Stern Tells Of "Jew In Soviet Russia

MUSICAL PROGRAM

Fels Brothers, Pianists, Will Provide Entertainment

The Maccabaean Circle will hold its first meeting of the 1929 season tomorrow, Sunday, Jan. 27, at 3 p.m. in Strathcona Hall. The executive calls attention to the fact that this meeting will take place in Strathcona Hall instead of in the Union Ballroom as previously announced. The change has been found necessary because the Assault-at-Arms ring and other paraphernalias could not be removed from the Ballroom in time.

Rabbi Stern, the spiritual head of Tempie Emmanuel, the Liberal Jewish Congregation of Montreal, will address the Circle on "Jewish Life in Soviet Russia." he is extremely well qualified to talk on this subject, having recently completed a tour of Soviet Russia which he undertook in company with other eminent educationalists for th express purpose of studying Jewish life there.

Before Rabbi Stern, who is a graduate of University of Cincinnati and came to Montreal, he was Rabbi for seven years at Uniontown, Pa., and in 1927 he resigned his post to occupy the pulpit of Temple Emmanuel. Although he has been here but a short time he has already gained an enviable and far-spread reputation both as scholar and as an orator. Recently, he has been appointed principal of the College of Jewish Studies, an institute for adult Jewish study along modern lines of thought, the only one of the kind in Canada.

Musical entertainment will be provided by the Fels brothers, Moe and Sydney, pianists. Apart from the address and the musical program, the president will have an announcement to make regarding the forthcoming annual debate with the U. of T. Menorah Society fo rthe Bennett Cup, which takes place here next month.

R.V.C. '29 Election

R.V.C. '29 this year's graduating class held a meeting in the R.V.C. yesterday, Adele G. Languedoc was elected permanent president and Mildred H. Ball permanent secretary. Ruth P. Dow, Ida P. Greaves and Gwen P. R. Roberts, were chosen Valedictorian, Prophet, and Historian respectively.

In the past it has been the custom for the graduating class to present the University with some gifts, and carrying on the tradition, the class has chosen a committee consisting of Agnes Morton, Olive Basken, Dolly Cox, to be in charge of this matter. A graduation committee: Sally Cox, and Elsie C. Johnson, was elected to arrange for all graduation functions.

The question of carrying flowers at convocation was brought up but was referred to a later meeting. The class officers state that at the present time there was only eleven persons left who have not paid their class fees yet, these are requested to pay up as soon as possible.

Pulp And Paper Building Opened By Willingdon

Governor-General Throws Switch Starting Mill

FOLLOWED BY LUNCH

Dean Ira MacKay Addressed Association At Ritz Carlton

Throwing over a switch which put the miniature pulp mill in the laboratory, into motion Viscount Willingdon Governor-General of Canada, formally opened the new Pulp and Paper Research Institute of the University at one o'clock today. Following the ceremony, His Excellency and the officers of the University taking part in the opening of the new building, together with the Honorable Charles Stewart, Minister for the Interior, were the guests of the Canadian Pulp and Paper Association at a luncheon at the Ritz-Carlton. Colonel Jones, President of the Association, presided and called first upon the Governor-General, and then upon Dean Mackay of the Faculty of Arts.

His Excellency arrived at about 12.30 and was met by Dean C. F. Martin of the Faculty of Medicine Acting Principal of the University, Dean Ira Mackey and Colonel Bovey. Before he descended to the basement he addressed a few words to those assembled, following, as he said in his opening remarks, the instructions of the chairman to those who were to speak to be extremely brief.

At the outset, the Governor-General regretted the absence of Sir Arthur Currie, principal of the University, who had actively associated himself with all negotiations regarding the new building. "I am sure", declared His Excellency, "that you will join with me in hopping sincerely that before long he will return to us full of health and vigor to carry on the great responsibilities that he has undertaken here as successfully as he has done in the past."

Lord Willington then stressed the value of research in such a young country as Canada, and then went on to state that in his opinion Canada had been very active in research hitherto. In agriculture research he gave as an example the discovery of the various new varieties of wheat which had increased the value of the crop to such a great extent. As an instance of medical research he quoted the discovery of insulin, and stated that all Canadians were proud of the fact a Canadian had made this great discovery. "And I am a proud man too", added His Excellency. "That it is during my term of office that the Dominion Government are establishing an institute of research at Ottawa which I hope will in the most comprehensive manner undertake all research questions with regard to the activities arising in the future of Canada".

Referring to medical again, His Excellency showed that it is research in that line which has just saved the life of the King. He also expressed pride in the fact that his country of Sussex had been chosen as that

Opens New Pulp and Paper Building

Lord Willingdon, Governor-General of Canada is seen opening the new Pulp and Paper Building yesterday at noon, surrounded by leading figures in University and Business circles.

Advice Given to Mining Students

Professor McBride Stresses Practical Work

"Students who expect to take the course in Mining Engineering are urged to start practical work in the mines as soon as possible, stated Professor McBride to the Daily yesterday.

Practical experience obtained in the mines during the summer vacations will not only help the students to appreciate and understand the instruction given in the Mining course, but will be of very great value after graduation. Six to eight months' approved practical work is required for the degree, but this is set as an absolute minimum, and every additional month will prove very valuable. To attain the highest success, the mining engineer must have extensive practical experience in mining, and the more he gets before graduation, the less time he will have to spend on it after leaving college. Those who start working in the mines at the end of the First Year, or better still at the end of the Pre-Science year, will be able to get a much broader practical experience than those who wait until later. During the different summers they will be able to work in several different districts, or to get experience in the different branches of the mining industry.

"I am so convinced of the value of this practical experience to the students that I shall be very glad to spend considerable time and energy in assisting those who have no connection

Athletic Coupons

Coupon No. 14 will be accepted for the basketball game between McGill and Clarkson tonight at nine o'clock in the Montreal High gym.

Coupon No. 13 will be accepted for the finals of the assault-at-arms in the Union ballroom tonight at eight o'clock.

Coupon No. 13 will be accepted at the Forum Monday Jan. 28th, when McGill plays U. of M.

Sessional Exam. Results Posted

Additional Standings In Arts Faculty Released

Additional mid-sessional results in the Faculty of Arts were released yesterday They are as follows:

Chemistry 3A

Class I.—Brodie (B.); Parkovnick and Thompson (W.), equal; Mersereau and Seltzer, equal; Baron.

Class II.—Graveline and Sadler, equal; Siminovitch, Mason (R. W.), Dorken, Butler (A. A.), Kay (M. G.), Robertson (T. D.), Arbovitch; Rubin (J.) and Sutton (G. L.), equal; Ella (A.D.); Bercovitz (G.D.) and Wheeler, equal.

Class III.—Mason (E.B.) and Shuster and Turner (D.C.), equal; Boyer and Jotcham (M.H.) and Tomlinson, equal; Townsend (M.G.); Hudson (P. A.) and Seymour, equal; Clark (A. W.) and Henderson (J.V.), equal; Grimes-Graeme, Macalister, McCormick (G.A.), Ogulnik.

Zoology I

Class I.—Nicholls (J.V.); Aiken and Klineberg and Mason (O.B.), equal.

Class II.—Johnstone (A.M.); Crab-

(Continued on page three.)

J. S. Woodsworth, M.P.

J. S. Woodsworth, M.P. of Winnipeg, will be the speaker at the Young Men's Forum next Sunday afternoon. The title of his address will be "Parliamentary Control of Industry," this being the fourth in the series describing suggested steps toward a more Christian Social Order.

The Forum Committee has endeavoured to secure a group of representative speakers who have definite convictions as to how Society may be made more consistently Christian. Last week, William Hapgood, an employer, gave the results of a very interesting experiment in the democratic control of industry. On February 3rd Norman Thomas, of New York, leader of the Socialist Party in the United States, will be the speaker.

As a result of this series the public of Montreal is having an opportunity this winter of honestly and intelligently considering some of the questions relating to the existing industrial order, which are troubling the minds and consciences of thoughtful people today.

Pharmacy Hop At Mount Royal

New Song, "Woopee" Will Feature The Occasion

"Whoopee," the song composed especially for the Pharmacy Dance, which is taking place in the Plazza of the Mount Royal Hotel next Friday night, is to be printed on the dance program, according to Slink Barza, Chairman of the Dance committee. The music and words of the song are the original creation of Irvine Krugie, the well-known Dental students.

The dance is under the patronage of Professor and Mrs. A. B. J. Moore and Doctor and Mrs. W. H. Hatcher. The music for this more than luke-warn hop is in the capable hands of J. Kruger's Entertainers. The catering is being taken care of by the Mount Royal Hotel in an unusually efficient manner. The words of the song "Woopee" which will be sung and played at the Pill-Roller's Glide are as follows;

Whoopee! Whoopee! See them all glide
Dancing pretty, side by side.
Boy I'll say, there's nothing small,
Down at the Pharmacy Ball
——— Just look!
Wroopee! Whoopee! there's a graceful turn.
Watch them closely and soon you will learn
How they do that alligator crawl!
Down at the Pharmacy Ball.
When the band starts playin'
Then I start swayin'
Hear that Saxophone blow
I'm just rarin' to go
——— let's go!
Whoopee! Whoopee See them all glide
Dancing pretty, side by side
I'll tell the world, there's nothin' small
Down at the Pharmacy Ball.

Loud will be the brays of soulful saxes, and thundering the booms of the great granddaddie drum. Jo. Kruger, eldest of the Kruger triplets, all of whom play in the orchestra, will dish out a program of music that will produce the uproariousness necessary to style the evening as truly collegiate. Tickets, at $3.50 per couple have been selling rapidly and only a few more are left at the Tuck Shop.

Wrestlers and Boxers Display Their Prowess

Semi-Finals Of Assault-at-Arms In Union Ballroom

TECHNICAL K.O.

Exhibition Bouts Outstanding Feature On Last Night's Program

Tonight's Draw For Interfaculty Assault-at-Arms

Boxing

112 lbs.—Kussner vs. Harris.
118 lbs.—Bernstein vs. Fyshe.
126 lbs.—Brodie vs. Copeman.
135 lbs.—Craig vs. Horn.
147 lbs.—Porteous vs. Gillard.
160 lbs.—Savage vs. Phillips.
Heavy Exhibition—Fred Taylor vs. Cecil Davies.

Wrestling

118 lbs.—Giulianelli vs. Weiss.
123 lbs.—Berger vs. Burk.
134 lbs.—Golfman vs. Levinson.
145 lbs.—Randazzo vs. Wise.
158 lbs.—Kinley vs. Wolever.
175 lbs.—Tedford vs. Craig.

The interfaculty assault-at-arms got away to a flying start last night in the Union when the semi-finals were run off before a comparatively small but none the less enthusiastic crowd. Eight boxing and nine wrestling bouts were run off the most exciting thing for the crowd being a technical knockout in the first round of the 135 lb. bout. No upsets came about but the card for tonight promises to keep the spectators well supplied with excitement from start to finish. Exhibition boxing bouts were a marked feature of the evenings entertainment as several of the college entrants failed to show up; Coach Bert Light managed to secure some of the Y.M.C.A. boxers to fill their places however and even entered the ring himself to stage a fast bout with Tommy Matthews, 135 lb. city champion.

On the list of schedule bouts, Bernstein and Sampson, 113 lb. boxers, put on a feature, the former winning by decision after three hard-fought rounds which seldom lagged; Bernstein took the aggressive at the start and used his longer reach to advantage Sampson being unable to get by his opponents guard. Things began to move in the second three minutes when Sampson started boring in and by the end of the round both fighters were obviously hard put to keep going; in the last thirty seconds both were at the stage where blow for blow takes the place of speed and fast delivery. Bernstein got away well in the last round and with a barrage of blows to his opponents head weakened him considerably; Sampson went on defence and came back strong a few seconds later and continued the fight till the gong, Bernstein being awarded the decision.

In the 135 lb. class Craig and Sutherland began well and showed a strong tendency to dodge any blows aimed at him and this proved his undoing when his opponent crashed a smashing right to his jaw after about one minute. Sutherland took the count for nine and got up to resume the fight; in his weakened con-

(Continued on page three)

Sir Robert Falconer

Sir Robert Falconer, K.C.M.G., D.Litt., L.L.D., D.C.L., principal of the University of Toronto will be the speaker at the Columbus Forum tomorrow afternoon in the Columbus Auditorium on Mountain Street. The subject under discussion will be "The Educational Factor in Character."

Sir Robert a noted educationalist has filled the office of principal of Varsity with distinction for many years. He is the author of several books, and has, besides, contributed numerous articles on educational and public subjects to British and American reviews and publications. He is a native of Charlottetown, P.E.I., and received his education in Queen's Royal School in Trinidad, W.W.I. He subsequently studied abroad at the Universitys of Edinburgh, Leipzig, Berlin and Marburg. He became a professor at Pine Hill College, Halifax and was made its Principal in 1904. He came from that post to his present position in 1907.

His Excellency and Dean Martin

Lord Willingdon, visitor of McGill, and Dr. C. F. Martin, Acting Principal, are here seen together after the opening of the Pulp and Paper Building yesterday at which the Governor-General officiated.

MONTREAL, SATURDAY, JAN. 26, 1929.

MORE SCHOLARSHIPS

It is common knowledge that the lack of sufficient money prevents many individuals from realizing their ambitions for a better education than can be found in the primary schools. The cost of a modern college education is inordinately high. The best and most promising students may be frustrated by sheer lack of financial resources from proceeding to further development in a university. Much valuable material must thus be wasted.

The evil of this condition of affairs in which, speaking broadly, the poor student is placed at a tremendous disadvantage when compared with the student who can afford such an education, was stressed recently by Sir Robert Falconer, Principal of the University of Toronto. In an effort to discover the causes of freshmen's failing to return to college on successful completion of their first year, he was able to find out that half of those who failed to return after the 1927 term stayed away on account of financial reasons. He pointed out that in spite of our per capita wealth in Canada, the time-honoured struggle to secure an education often ends in many a student finding himself handicapped through lack of funds.

This condition is not greatly minimized by the number of scholarships and fellowships contributed by various persons to provide greater freedom for intellectual work, as in the first place there are relatively few such scholarships, and secondly they are often won by students who would be proceeding to a university education without such aid.

The solution is manifestly to increase these scholarships and fellowships, and to so apply them that they will be utilized where most needed. Often a comparatively wealthy student relinquishes the monetary award attaching to a scholarship to the next in line if this will enable that person in second place to reach college when he or she could not otherwise have done so. This is an ideal worthy of greater application. But the main solution lies in increasing the number of such opportunities by an increase of scholarships. A limitation of the monetary award to that candidate in line of succession t othe winner (who, being wealthy, is not in need of the financial aspect of the scholarship but only of the honour attaching thereto), might bring about a fairer condition of affairs.

The evil effects of part-time work, or "working a way through college" have also been stressed in a recent investigation which was held in the United States. The general view is that those students who work their way through college are usually better students but investigation proves that working does interfere with studies, and that those working students who do really brilliant work do so in spite of not because of the necessity which they labour under of partially or wholly making the own livelihood.

Thus one of the ways in which alumni who have the good and interest of a University at heart is to endow a scholarship to assist more unfortunate students whose only disability lies in their pocket from securing their legitimate rights. Complaints that such scholarships result in loss of self-respect and disdain from others are refuted by a study of the Carnegie Trust which last year provided for 1,404 students in Scotland.

THE UNDERGRADUATE EXCHANGE

The essence of the Exchange of Undergraduates' scheme which is being put into effect this year by the National Federation of Canadian University Students is to allow a student to spend his Junior Year at another university than his own sharing the educational advantages of such a change, and representing his own university in the life of another. Such a student would return to his final year at his home university. These "Ambassadors" of college life in Canada would benefit financially by not being called upon to pay fees at the university which they attended during their second to last year.

These students are to be chosen by application to a Selection Committee in each University according to merit in regard to personality, maturity, breadth of vision, scholarship, ability in athletics, and qualities of leadership, —a Canadian equivalent to the status of Rhodes Scholar. Applications of students to the McGill Committee which will consist of a member of the Faculty and a member of the Students' Council, must be handed in by April 30, 1929, and may be addressed to the Secretary of the Students' Council. While the plan is not yet complete in its fullest details, the scheme will be able to come into force this year as nearly all the Universities have approved of the scheme and cancellation of fees with the exception of Toronto and McGill who still have the plan under consideration.

The whole success of the scheme rests on the response and use which the students make of it. If any McGill students intend to go to another college during their junior year, they may be well advised to apply for these fellowships. A year's study at another University will be found valuable not only to the individual concerned in the studies and personal contacts which may be made, but also to the University visited in that the scheme cannot fail to lead a closer sense of unity between the universities of this Dominion of Canada where the tremendous distances involved often have a regrettable tendency towards insularity.

Women, of coures, as well as men, are included in the benefit of the scheme.

THEATRES

This aud That

Having no Vital Message of which to relieve myself this week—or rather, not being able to think up one—we must chat of this and that, skipping lightly from movies to talkies to vaudeville to the poor old legitimate, or what-have-you?

* * * *

So first in the list we come to the question of movie censorship, debated at some length the other day by members of Arts 2. As conducted in this righteous Province of Quebec, movie censorship has proved to be a futile attempt to protect and improve the morals of the dear "pepul", alternately ludicrous and pathetic, and in but rare instances accomplishing its object. Granted that there are certain scenes unnecessarily suggestive and which ought never to have been made, yet this is no reason for changing beyond recognition stories read and acknowledged as classics by intelligent people. Perhaps it is that movie-goers are not intelligent.

With the coming of the sound pictures more opportunities than ever are offered to the censors to display their workmanship. In the "sound-track" type, which has the musical or vocal accompaniment printed on the side of the film, when a scene is cut out, the music is likewise removed, so we shall probably have an effect something like switching from one radio station to another. Perhaps the producers will make these scenes without accompaniment; they don't generally need much. In the other type, in which the music is merely on large phonograph records, nothing can be done except re-recording the record, which would involve rearrangement of the musical score, or putting in blank film in place of the deleted portion. If this were not done, the sound film and picture would fall out of step, of course. An amusing example of this (the blank film dodge) occured a week or two in "A Woman of Affairs". Greta Garbo and John Gilbert went into a long—rather unnecessarily long—clinch, which apparently bowled the censors quite over, so we see the preliminaries, and then several moments of suggestive blankness, probably just as harmful—if not more so—than the actual scene.

Several glaring example of former years come to mind; "The Scarlet Letter" in which our moral guardians married the two lovers to make things look right; "Anna Karenina" re-titled "Love" where Anna's husband is made her guardian or uncle or something equally innocuous; "Variety", the really fine German picture with Emil Jannings and Lya de Putti, from which over a reel was removed near the beginning of the picture, destroying the background of the story; "The Merry Widow", and many others. Just last week we had to suffer one or two mutilations in "Sins of the Fathers"—there will no doubt be more next week.

Some check upon the excesses to which the screen can go is certainly necessary, but why inflict some of the inanities that the Quebec Board of Censors does upon a presumably intelligent people? Apparently the Board does not think Quebec people are.

* * * *

The first talking picture has at last arrived and gone, leaving behind many diverses opinions about it and its successors. To me it seems at present nothing more than an interesting experiment, with the future of full-length all talking pictures rather doubtfull; we shall be better able to judge their worth after we shall have seen a few more. In the meantime, there are one or two points worth noting.

For newsreels, short humorous subjects, and purely musical accompaniment to feature pictures the sound equipment has proved its worth. Even in the newsreels, however, care must be exercised in choice of subjects. Many—in fact most—sounds do not record as they really sound, and the effect is sometimes more of a detraction from the whole, rather than an aid. Producers have apparently spent some thought on a few of the "talking shorts" with the result that the average one is at least acceptable. "The Night Court" last week, and the one about the family picnic, which showed about two months ago were really enjoyable.

But note, in these and in the news reels, the sound part is an essential to a complete whole; it is somthing without which the picture would have no value; it is not something which, if not tacked on as an afterthought, could at least be conveyed by other means. "Talkies", to be of any real superiority over silent films must have this distinguishing element. "The Terror" certainly did not, and yet it was not entirely unsuccessful. Taken from the stage play, it retained the closely knit qualities of action and scene which the play has had to develop through mechanical limitations of the stage, and the wanderings about the house involved no great strain on the imagination. Whether the effect will be satisfying in a talking picture of more varied locale remains to be seen.

On the mechanical end of the question much remains to be done. Speech is not clear, particularly the letters f, s, etc. Noise effects do not record naturally, voices all sound the same, music is inclined to be "tinny"—and so on—the objections you have probably raised yourself. It is mainly a matter of more money for better equipment, which should come eventually.

However, much the talkies may be improved, though they must develope as a means of expression different from both the stage and the silent movies. They cannot become mere imitations of the spoken drama, for that has the one big advantage which will enable it to meet all competition and in time regain its proper place in the world of the theatre—the human presence.

Next Week at Local Theatres

PRINCESS — American Opera Company in a repertoire of seven Operas.

ORPHEUM — 'The Girl of the Golden West" — an old success with Helen Kingsley and the Orpheum Plays.

IMPERIAL — "Padlocks of 1928" — a condensed version of Texas Guinan's revue, without Tex. Picture — "Scarlet Seas."

LOEWS Bebe Daniels in "What a Night!" — Six acts of vaudeville.

PALACE — "The Shop Worn Angel" with Nancy Carroll and Gary Cooper. — synchronized accompaniment.

CAPITOL — "Alias Jimmy Valentine" with William Haines and sound accompaniment — Stage show.

GAYETY — "French Models" burlesque.

PRINCESS

Forced by capacity audiences in Toronto to remain in that city beyond their scheduled engagement, the American Opera Company of one hundred Canadian and American singers, will come to the Princess Theatre here on Monday next to give Montreal its first elaborate season of grand opera in several years. A repertoire of seven operas will be presented, "Faust," "Madame Butterfly," "Carmen," Mozart's lovely "Marriage of Figaro," a new American opera "The Legend of the Piper," together with "Pagliacci," and "Martha." Because of the tremendous popularity of both "Faust" and "Carmen", which have sold out several times in every city in which the company played, each of those operas will be repeated during the single week's engagement here.

Seldom has any artistic organization in the history of the United States or Canada received such acclaim as these artists, who are playing their extended engagement in Toronto to copocity audiences. "The world has had to wait seventy years to see and hear the 'Faust' of which Gounod dreamed when he wrote his score," was the way the Toronto Telegram acclaimed the performance, while the Star stated that "Not since the 90's have we had such a startling production a complete advance on all the old style methods, not excepting the Metropolitan. A new kind of magnificant ensemble, such an ensemble! The effect is that of living pictures. The theatre was packed." The company comes to Canada after a triumphant tour which began in the United States over a year ago, when President Coolidge and the entire Government Cabinet inaugurated the new institution before a most brilliant audience. Chicago has had eight weeks of capacity business, New York ten, Boston six, Washington two, Buffalo noe, and Toronto two, and a score of other cities have acclaimed these singers, who, under the direction of a master stage-craftsman, Vladimir Rosing have set new artistic records and broken box office records at the same time.

Among the principal Canadian artists to be heard here in leading roles are included John Monerieff, bass, of Winnipeg; Allen Burt, baritone, of Toronto; Brownie Peebles, contralto, of New Westminster, B.C.; and Doreen Davidson, soprano, of Vancouver. One of the principal organizers and backers of the company is a Canadian woman, the former Margaret Huston, of Toronto, and the company manager is a Toronto man. Because of the large seating capacity of the Princess, the manager, Mr. Wright, announces that popular prices will prevail for the grand opera engagement, and the usual Wednesday and Saturday matinees will be given during the opera week. This is the largest operatic organization to visit this city and the massive stage acts, designed by Vladimir Rosing, Robert Edmund Jones, and Norman Edwards, the latter working under Rosing's direction, require five large scenery cars to transport across the continent. The orchestra pit at the Princess will be enlarged to care for the orchestra which the company brings with it on tour.

ORPHEUM

Next week the Orpheum Players will present a play which has enjoyed greater popularity than most during the past fifteen years or so. It is "The Girl of the Golden West," David Belasco's biggest success, and its release for stock brings it within the range of a large number of people who never saw it on the road or as a metropolitan production.

This play tells a romantic story of the West, against a colorful background, and is rich in incident, in thrills, in qualities of adventure and sentiment, which make it a drama of peculiarly effective appeal. The heroine is the Western ideal, and she has stood for nearly twenty years as a standard of what western heroines ought to be. Giacomo Puccini, the great Italian operatic composer selected "The Girl of the Golden West" when he wanted a story of the western hemisphere to serve as the basis for a libretto for a new opera and that opera was sung with tremendous success on both sides of the Atlantic, proving conclusively that there were in the story itself the elements of universal sentiment. David Belasco made htcatrical history with the play itself, and its popularity has endured far longer than that of the most popular drama. It will provide Miss Helen Kingsley with an entirely new medium for the exercise of her art, and it should also serve to illustrate from a new angle the versality and resourcefulness if the Orpheum Players.

GAYETY

Viola Elliott brings her "French Models" to the Gayety Theatre for an engagement, starting Sunday evening. She will offer several alluring dances and her songs will include "It's Gettin' Hot," "Oriental Twist," "Nighty Night" and "St. Louis Blues." Another soloist will be the pretty ingenue, Edythe Bates, who will sing "Chinese Honeymoon," and "Oriental Dream." The principal comedian will be George Hart and his associate will be Jack Burns, basing their "play" for laughs on tramp and eccentric characterizations.

A negro preacher walked into the office of a Southern newspaper and said: "Misto Edito", they is forty-three of my congregation which subscribe fo' yo' paper. Do' that entitle me to have a church notice in yo' Sa'day issue?" "Sit down and write," said the editor. "I thank you." And this is the notice the minister wrote: "Mount Memorial Baptist Church, the Rev. John Walker, pastor. Preaching morn'ng and evening. In the promu gation of the gospel, three books a necessary: The Bible, the hymn boo and the pocketbook. Come to-morrow and bring all three."

"That guy's a dent!"

"Yes, an accident.

Our Weekly Letter

By Elizabeth Jane

Dear Readers, Readerettes — and otherwise:

Allow me to discourse upon "Aristocracy". This subject includes the conception, development and death of the illusive something or other which some men strive for, others detest, and still others, a very few, do not worry about, namely aristocracy. It first appeared when Abel and Cain disagreed. It seems that Abel raised Cain and in doing so elevated him to a higher social status. Later Helen showed her face to a thousand ships, and they all moved off to Troy. Unwise of them, but it developed a military aristocracy. The death has not yet taken place, despite the serious attempts of Danton, Marat and Co. Ltd. The Grand Duke of Anasthesia still lives, and in him is vested all aristocracy. He is coated with it.

✣ ✣ ✣

Another subject, Socialism and Communism, proves to be very intriguing. Why are not they the same thing? What is the difference between them if any and why? My slant on the subject is that socialism does by Parliamentary measures what communism attempts to do by force. However, I am very probably wrong.

✣ ✣ ✣

Which all goes to prove that men come and go, but man goes on forever as Plato said.

✣ ✣ ✣

I am given to believe that some South Africans, or was it Australians have been, are, or will be in Montreal

✣ ✣ ✣

A Few Hints To Prospective Poetry Writers

Some Helpful End Rimes

Moon, soon, love, dove, mine, divine true and blue, often used in such phrases as "I'm so blue, please be true etc.". The best pair seem to be honey and money. (a very agreable combination to say the least.) This can go on ad infinitum; but I'm darned if I'll write 'em. And so to bed—without any supper. Incidentally one can always make the word supreme to sound someth'ng like Pauline Sylvine, Albertine, or some other such feminine nomenclature.

✣ ✣ ✣

Rumor has it that the Faculty of Medicine had a dance the other evening.

✣ ✣ ✣

A Problem Play

French Maid: Enter Madame.

Madame: Mrs. Doodlelumsqueek is home is she not?

F. M.: Yes Madame.

Madame: Might I see her?

F. M.: No Madame.

Gym Men Show Good Form In Daily Practices

Last Year's Team Available For Intercollegiate Meet

MACKAY PROMINENT

(By H. M. Baker)

Anyone dropping into the Montreal High school gymnasium almost any day during the week would be surprised to see numerous white-clad people doing all sorts of intricate and breath-taking movements on the various pieces of apparatus to be found there.

At first the impression derived from their antics is that these people are direct descendants of the great anthropoid apes or the immortal Tarzan of story book fame, giving vent to their feelings in this acrobatic manner. This however, is not the case These white-clad men are none less than the McGill gymnasts, who are working-out faithfully and strenuously for the coming Intercollegiate Gymnastic Competition, which is being held in Toronto on the 23rd of February.

Prior to the Intercollegiate meet the gymnasts will have an opportunity to disvlay their wares on two occasions. The first in the Wicksteed Competition, which is being held in the M.H.S. Gymnasium on February 8th at 8.30 p.m., and the second in the R.V.C. exhibition which is being held on the 15th of February, where they will put on a number of special turns on the various pieces of apparatus.

Champions Back

With all of last years champions team and some other good men contending for the honour of representing the college at Toronto, it is very hard to try specify as yet just who will make the team. Although it looks as if last year's team will remain intact, it is difficult to say or not this will be the case, for there are several other good men who are sure to give last year's men a hard fight for their places on the teams.

But, irrespective of who makes the team, we can be certain of one thing, and that is, that McGill will be represented by one of the finest aggregations of gymnasts that the college has ever turned out. Hopes are particularly among the gymnasts in regards to their being able to defend successfully the championship they regained last year after an absense of two years.

Among that Mr. Hay Finlay has been coaching assiduously for the past two months are Captain Ned. Pacaud, Bill Consiglio, Wolfe MacKey, last year's individual Intercollegiate champion, Ray Caron, Al. Holland, and Weir Davis.

It may be of interest to note here that, out of the above-mentioned six men there are five former captains, three of whom have been on championship teams.

Other men who have been turning out and are showing good form, although not quite up to the high standard set by the above-mentioned men, are Harris, Baker, Dumbell, Jacobson, Hickey, and Wallace.

Great Interest

The interest in gymnasium work in McGill circles is apparantly picking up to judge by the large audiences who have witnessed the various competitions. The result of winning the the championship last year is apparent in the number of freshmen who have displayed an ardent interest nd who have been turning out faithfully to all practices.

Among these are MacIntyre, Elliot, Innes, Walker, Roberts and Schlesinger. Although these men are all eligible for the Dr. Harvey Trophy for the best freshman in the annual Wicksteed Competition, they will be coming up against stiff competition, as some of last year's men are now in first year Law.

DEFENCE PLAYER

Eddie Silverman, defence player on the McGill senior basketball squad who will be seen in action on Saturday night against Clarkson University. Silverman has been a steady performer with McGill cage teams for four years and has developed into one of Coach Van Wagner's best bets on the senior squad.

Basketball Tilt

Coupon No. 14 will be accepted for admission to the McGill-Clarkson basketball game which takes place in the High School gym tonight at 9 o'clock.

Water Polo Loop Begins Next Week

Teams Formed For Inter-Faculty Competition

The Inter-faculty polo gets under way next week, when Arts and Commerce clash in the opening game of the series on Monday afternoon. Neither team has had much chance to practise but they will both be equally handicapped in this respect and the game will be close if nothing else.

Anyone who is able to play, whether he has any experience or not is urged to turn out at once, and notify the captain of his faculty team of his intention. The faculty captains are, Arts, Munroe Bourne; Commerce, Aubrey Shackell; Science, Pete Southam, Medicine, Cambell Gardner. Anyone not acquainted with his faculty captain, come down to the tank on the day his team is to play and he will probably get a chance to show his wares.

The rules for eligibility state that the players in this series must not have played more than one game in the senior City series this fall. An exception to this rule allows the regular senior goalkeeper to play out in the Interfaculty games.

The schedule is given below:

Jan. 28.

Arts vs. Science.

Jan. 30.

Commerce vs. Medicine.

Feb. 4.

Arts vs Commerce.

Medicine vs. Science.

Feb 6.

Commerce vs. Science.

Feb. 8.

Medicine vs. Arts.

All games to be played at the K. of C. tank, starting at 5.15.

Intermediate Hockey

McGill Intermediates meet Bishops at the Loyola rink at 7.00 tonight. As there is a game before and a game after this contest, it is absolutely imperative that it start on time. The Following men will play:— Klein, Bedbrooke, Painter, Ward, McGillavray, Hutchison, Ireland, Bernier, Urquhart.

Strenuous Work By Rowing Club

Excellent Chances For New Material

Quite a few men are turning out daily at the Field House in the Stadium, for the rowing practices in the afternoon, according to the testimony offered a Daily reporter who wandered up there yesterday, but despite this turnout, he was impressed by the coaches urgent call for more material to choose from. There is a great scarcity of men who are willing to start practicing at once for a sport which is only going to be actively taken up during the summer months, but the coach insists that it is the only possible way for any rower, a beginner or otherwise, to get into decently good condition for this most strenuous of all sports.

As a conditioning exercise in itself, a workout on the machines is about the best example of all-round training that McGill can offer. Several of the men on the machines at the present time are avowedly there for no other purpose than to get in good trim, and yet, Mr. Molmand, knowing their attitude, is still ready, he claims, to give them all the attention which he is giving to the more serious men who are considering staying around during the summer season.

There is every reason to believe that if only a few additional men can be found to exert themselves, that the McGill crews next year can easily win several events at the Henley and the Intercollegiate race. Any man who turns up now will have a good chance to make the crews.

Slalom Races This Afternoon

Entrants Will Meet At Lookout At 2.15

This afternoon, the McGill Winter Onting Club will hold another slalom race. This event will be for practice only, and will not be a spoon competition as have the last two races. The race will be held in the vicinity of the look out, and those who intend to enter should be at the lookout at 2.15.

This race will afford excellent opportunity for those who have not done this kind of skiing to prepare for the big meet to be held on Friday and Saturday of next week, and incidently to improve the brand of skiing around the college. Following under he leadership of the team captain, Ted Johnson. This will not be a race, or competition, and it is hoped that everybody, whether entered in in the slalom race or not will join in their part of the programme, which should be most enjoyable.

It is really much more pleasant to ski with a party, and everyone is invited to join in with the members of the Club.

A slalom race is very interesting to watch, The course is laid out on a steep slope, and flags are placed in pairs so that to go between them requires either skilful turns or a fall. In most cases a fall proves fatal for much time is lost, in making a recovery, and also the speed necessary to win. It not only requires skilful turning but also good judgment, for if a flag is touched with either the body or ski a second or two is added to the time, depending on the length of the course.

Award For Study Of Corbohydrates

New York.—The Nichols medal for "research published during the current year which, in the opinion of the jury, is most original and stimulative to further research," has just been awarded to Prof. William L. Evans, chairman of the department of chemistry in Ohio State University, according to announcement by the New York Section of the American Chemical Society.

The award was made to Professor Evans for his contributions to the chemistry of carbohydrates, the announcement said. The medal will be forfally presented to him at a national gathering of chemists here on March 1, when he will deliver an address on The Mechanism of Carbohydrate Oxidation."

The Nichols medal was established in 1903 by Dr. William B. Nichols, a charter member of the American Chemical Society, to encourage original research in chemistry. It is considered one of the most distinguished of American honors in chemical science.

FENCING FACTS

All supporters of the B.W.F. Club are assured of seeing three first-class fencing bouts to-night, when Brown, Desbarats and McKergow are asked to retain their laurels and keep their places on the team. To do this they must defeat Henneman, Dechazal and De Montigny. Mr. Maguire and Mr. Long of the Montreal Sword Club have kindly consented to act as judges and Mr. Raimondi, the coach, will assume the important duties of referee. The first bout will take place at 8 P.M. and the other two later on in the program.

In order that the performance will be more intelligible to the spectators a word of explanation is not out of place. There will be three bouts. Each bout will be decided by one of the candidates first placing five hits on his opponent. A hit, to be valid, must hit on the target that part of the body between the waist and shoulders, exclusive of the arms and back. Each bout is divided into phrases. Thus if one man lands the point of his foil anywhere on his opponent's body the phrase is broken and a new engagement must be made. This accounts for the many pauses which do not result in a score.

A point may be made in one of three ways:

As the result of a direct attack. This is the most usual way.

By a ripost. This occurs when the person on the defence successfully parries his opponent's attack and is able to land his point as a culmination of the parry.

By a remise. The person attacking is parried, but in turn successfully parries the riposte and scores. This is a very difficult performance, and seldom occurs.

All persons interested in the Club will be very pleased to hear that this year there was a larger entry in the elimination than for many years past. In addition to this the standard of fencing has been very high, the freshmen in particular doing very well.

On Monday 14 first year men entered. This number does not include all who might have entered had not the mid-term exams been so close. R. Harvey-Jellie and Arcand emerged victorious on Wednesday 12 of the second year men showed their wares. Dechazal, Henneman, Boisennault, Donald, DeMontigny and Hayakawa were picked as winners.

Yesterday De Montigny eliminated Arcand, and Harvey-Jellie defeated Hayakawa to enter the semi-finals. All three bouts in the semi-finals were very closely contested. Henneman defeated Boisennault after a very gallant opposition by the latter. In the next bout Donald experienced much difficulty in locating the target of the left-handed De Montigny. The latter won out by a 5-4 score. The next bout was an upset. Harvey-Jellie who began to fence only this fall, forced Dechazal, an experienced fencer to show all he had to win by a 5-4 score. This was a very long bout and both men were rather tired at the end of it.

Two weeks from to-day the five best fencers at McGill travel to Northfield to meet both Norwich and Dartmouth in a series of international Intercollegiate bouts. A cup will be presented to the fencer making the largest score in the foil tournament. This meet, coming one week as it does before the Intercollegiate will be very fine training for the boys, who sincerely hope to bring back the Championship this year after its long absence from home.

CLASS HOCKEY SCHEDULE

The second half of the Class Hockey schedule begins on January 30th.

In the first half there were rather many defaults and it is hoped that the Managers of the various teams will see that a team is put on the ice for all games in future. In respect to, the above statement, the attention of the Manager of Arts H, Medicine III, and Commerce IV. is particularly called.

The schedule herewith published is drawn up along the same lines as that before published for the games of the first half.

There are several games of the first half which must be played on Monday and Tuesday of next week. This has been necessitated due to the inclemency of the weather on those days when such games were scheduled to be played. The day and time will appear at another place in this issue.

The practice hours for the second half of the schedule are also listed below.

INTERCLASS HOCKEY SCHEDULE, SECOND HALF.

Date	Teams	Time
Jan. 30.	Comm. I vs.. Med. I	4.00 to 5.00
Jan. 30.	Comm. III vs. Med. III	5.00 to 6.00

Law, Tuesday 12.00 to 1.00 (Hollow Rink).

Dent., Monday 4.00 to 5.00 (Feb. 4, 6.00 to 7.00).

Theol. Friday 3.00 to 4.00.

WRESTLERS AND BOXERS DISPLAY THEIR PROWESS

(Continued from page one)

dition he soon received a barrage of rights and lefts to the face and again went to the boards. Referee Light awarded the bout to Craig on a technical knockout.

Guillanelli, one of the strongest contenders for 118 lb. wrestling honours, scored a victory over Lapin after five and a half minutes of wrestling, the falls being in 3.50 and 5.30. In the 174 lb. wrestling, Randazzo and Gemmell fought the full nine minutes in a class bout Ranig his greater experience and on his dazzo gaining the decision by apply aggressiveness in the second round.

The 112 lb. boxing bouts were next on the program, the first being an exhibition between Kussner, McGill and Martin of the Y.M.C.A. Martin was the more experienced of the two but the McGill man put up a good fight and can be expected to turn in a good showing tonight; Kussner received a badly cut nose during the fight which may ramper him in his bout with Harris tonight. No decision was given. Harris, McGill, and Buchanan, 108 lb. city champion staged a fast bout the decision going to Buchanan; Harris showed up remarkably well against a fighter of Buchanans calibre and will be in the pink of condition for his bout with Harris.

In the 123 lb. wrestling Berger scored a fall over Rostenberg in 2.25; Rostenberg was the aggressor throughout the fight and it was Bergers experience and speed which gained him the fall and the decision Wise scored a decision victory over McNaughton in the 145 lb. wrestling gaining two falls in 3.40 and 5.55. One of the most even of the wrestling bouts was that between Kinley and Cameron, neither man being floored during the first round; Carreron took the mat for the first half of the second division but was unable to get out of Kinley's hold; in the second half Kinley was again the aggressor and was given the decision.

To wind up a good evenings entertainment Coach Bert Light and Tommy Matthews of the "Y" staged an exhibition which set and kept a good pace for speed. Coach Light has lost none of his agility and proved that he is still able to keep his pupils at arms length; no decision was given.

Tonight's bouts will start sharp at eight o'clock the finals of the fencing tournament will be run off.

Results:

BOXING

112 Lbs.

Harris vs. Smith, Harris won by decision.

Kussner vs. Goodman—Kussner by default.

Exhibition—Kussner vs. Martin (Y.M.C.A.) No decision.

Harris vs. Buchanan—Buchanan decision.

118 lbs.

Bernstein vs. Sampson —Bernstein by decision.

126 lbs.

Brodie vs. Smaill—Brodie by default.

135 lbs.

Craig vs. Sutherland—Craid Tech. K.O.

Exhibition.

A. E. Light vs. Tommy Matthews (Y.M.C.A.).

WRESTLING

118 lbs.

Guillanelli vs. Lapin — Guilanelli two falls in 3.50 and 5.30.

123 lbs.

Burk vs. Kivenko — Burke, one fall in 6 05

Berger vs. Rostenberg — Berger, one fall in 2.25.

134 lbs.

Golfman vs. Playfair — Golfman, two falls in 30 secs. and 3.25.

Levinson vs. Levitsky — Levinson by default.

145 lbs.

Wise vs. McNaughton — Wise, two falls in 3.40 and 5.55.

Randazzo vs. Cooper — Randazzo, two falls in 45 and 4.25.

Randazzo vs. Gemmell — Randazzo by decision.

158 lbs.

Kinley vs. Cameron — Kinley by decision.

R.V.C. Ski Club Is Now Formed

Coeds Also Take Up Badminton And Shooting

The Athletic Association of R.V.C. is extending its activites to include badminton, ski-ing, and rifle shooting Clubs were recently formed to enable those interested in the above sports to engage in them to a greater extent and more informally than the classes of the Physical Education Department permit. The programs of the clubs are to include competitions, social events, and, in the case of the ski-ing club, week-end trips to the Laurentians. The full plan of action has not yet been decided upon, but it is expected that the first executives, which are to meet very soon, will have plenty of interesting ideas to report. Of course the Ski Club is counting on the assistance of the men's club to pep up some of the parties.

The interest of the McGill co-ed in sports is steadily increasing. The Department of Physical Education, the R.V.C. Athletic Association, and the M.W.S. Athletic Association are largely responsible for this growing enthusiasm for activity. Early this autumn riding became the regular practice those co-eds who had equestrian ambitions; swimming has become so popular (due, no doubt, to the proximity of the Y. W.) that it has been organised, and honoured with Manager; and now ski-ing badminton, and rifle shooting are offered to those who find the other sports not to their liking. When one recalls that R.V.C. boasts a gym (pillared and not vaulted though it may be) as well as a half fitted out for basket ball and badminton one has to admit that in this a least they have an advantage over the men students.

Learn-To-Swim

Judging from the number of people who announced their intention of coming down to the tank this afternoon, the first learn-to-swim class ever held by the McGill Swimming Club will be a big success Those students who cannot swim at all, and those who can swim a little are invited to turn out. The coach, Mark Veary of the K. of C. will be on hand, and will give instructions to beginners on the simplest strokes and those who already have some experience will be coached in the more difficult strokes.

The classes will be held every Thursday afternoon at the Knights of Columbus tank, on Mountain street just below St. Catherine. They start at 5.30 sharp and everyone is asked to be there sharp on time. There is a nominal fee of 10 cents for soap, towel, etc.

School Life Drab For French Youth

Students Strive Mainly To Get Results

Eugene, O.—France still clings to the theory young people are sent to school and college solely to learn things out of books and to show results for money expended on their education, according to the Oregon Daily Emerald.

"Bright college years" and "dear old school days," mean little in the life of the French student. From the time he first starts to school in a black sateen pinafore to the day he takes his degree in dignified cap and gown, he is made to feel the seriousness of the business of being educated. The schoolgirls and women students have the same solemn attitude toward school says an Associated Press story published recently.

Sports are almost entirely foreign to French school life and the fun the Paris undergraduate has around the old Latin Quarter is considerably less since the war.

South African Students Liked Montreal Visit

(Continued from page one)

ing of the flag that would signify that the race was on, and that they could start on the run of a mile or two where they staked out their 25-foot square claims. Before the race, the police, gathered in from all over the Union for the occasion scour the country ahead of the runners to discover the men who hide in such places as ant-hills and cover themselves with all sorts of disguises to get a start on the others.

When the race is on those who arrive first feverishly drive their stakes in what are considered the most likely spots. Mounted police are on hand to settle disputes with a crack on the head of the belligerent parties. Nevertheless the substitution of a stake for one already in the ground is a common practice. Often the man who arrives on the scene after the excitement has died down gets some small triangle that has been left over and which may prove to be a lucrative claim. Professional runners from all over the world are hired by corporations to run in this race and stake the best claims.

Gold money is in common circulation in the Union even more so than in England since the war. This is not surprising, Mr. Watson pointed out, because South Africa produces a very large proportion of the world's gold. The introduction of the cyanide method of refining the gold was a great forward step in this industry. Previously a mercury process was used which was much less thorough. If a suitable solvent is found for platinum the not inconsiderable deposits of that metal found in the Union will be available at a reasonable cost.

There are no indoor sports in South Africa, as outdoor sports are possible all the year round. In this connection Mr. Watson especially remarked on the completeness of the athletic facilities in the American colleges already visited, such as Michigan. Rugby is the national game of South Africa. Cricket and soccer are also extensively played. The Union has produced many fine track stars, and some success was experienced in the hurdles at the last Olympic Games. Marathon running is very povular, both at the regulation distance and at much longer. There is an annual race from Maritzburg to Durban, a distance of 60 miles, in which there are usually over 50 entries. Over half finish the race and the time of the winner is eight hours. The mail train takes over four hours. The natives will not believe that white men really can run that fast as they see the runners only at a given point on the route if at all. South Africans were among the contestants in C. C. Pyle's Bunion Derby a year ago.

Questioned as to his impression of Canada, Mr. Watson declared that he found the cultural atmosphere more like home. Canada seemed a typical British Colony, a pleasant surprise, because he had expected it to be more like the United States. The casualness of those in the reading room of the Union where the interview took place was in contrast to the hustle and bustle in American college buildings. New York and Chicago were found true to their reputation for noise and hurry.

The future of the Union lies along the lines of agriculture. Extensive immigration facilities will have to be installed before the full realisaion of the potential resources of the land can be completely tapped, and this points to the need for trained engineers who themselves can do nothing without being preceded by sufficient capital. Opportunities for trained engineers also lie in the development of roads, the building of bridges, and the general improvement of agriculture.

There are over 5,000 students in the four universities of South Africa. The state-controlled University of South Africa has six sections: Natal University College at Maritzburg, Transvaal University College at Pretoria, Grey at Bloemfontein, Rhodes at Grahamstown, Huguenot near Capetown, and that at Potchefstroom. There is a white population of 1,600,000 and there are five million natives. Of the whites about 55% are of Dutch origin and the rest English. Many of the best South Africans are leaving the Union for Rhodesia, and many of the immigrants from Europe go right through to Rhodesia. Nevertheless agents are maintained in the important centres of the world to make South Africa known, and as a result American tourists are finding the country an ever increasing place of interest.

There will be an election in South Africa this year. Both the leaders of the big parties, Smuts and Hertzog are confident of victory. It seemed to Mr. Watson that the flag question was made to assume such an important complexion because of politics and not because of any inherent weight. The loyalty to the British connection is not to be doubted, and Cecil Rhodes, the great empire builder is still the national hero. Although Rhodes did his great work in South Africa, many more Americans go to Oxford on his scholarships than do South Africans. This is due to the fact that he apportioned the money according to population. There is at least one scholar goes from each province every year.

The present tour is one of four from the Union now in progress. The other three are to Britain; France and Switzerland; and Germany and Australia. The first of these tours went out in 1923 to England, Holland, and Germany. It was composed entirely of engineering students. The present tours include all classes of students from all the universities.

Advice Given To Mining Students

Continued from page one.)

with mines to secure jobs for the summer. Students who wish for this assistance should apply to me as soon as possible, giving a statement of their former experience. Those who apply first will receive first consideration, and it may be impossible to place those who do not get their applications in promptly."

South Africans Leave Montreal For Boston

Scene last night as 37 South African university students left Montreal via Windsor Station after three days experience of Canadian climatic and cultural conditions.

Red And White Revue Notes

From now on all notices in connection with the Red and White Revue will be posted in this column. All those connected in any with the Revue MUST consult this column every day. It is imperative to the progress of the Revue that the instructions issued through this column be followed through promptly by those concerned.

All those desiring jobs connected with the construction of scenery are invited to meet the stage committee in the Union Ballroom on Monday at 5.00 p.m. No previous experience is needed and all are welcomed.

Remember, follow Red and White Revue notes on the Back page of the Daily every day.

Choral Society

NOTICE CHANGE IN REHEARSAL HOURS

SATURDAY—2.30 P.M.

ACT II (CREEPERS)

Misses K. Bovey, G. Gilson, Murray, C. Black.

Messrs. C. Dale, Broderick, Nicholls Picard.

SATURDAY—3.30 P.M.

ACT III (ANTS)

Miss Bovey.

Messrs. D. Fye, Sid Pierce, P. Sise, F. Poland, Levitsky, Broderick, Lapin, Hanbury, Black, G. Gales, G. Nicholls.

SATURDAY—4.30 P.M.

ACT I (BUTTERFLIES)

Misses. Phyllis Lee, Rita Macdonald, Messrs. H. G. Donald, I. Gillespie, J. Desbaillets.

It is imperative that members of the cast be at rehearsals on time.

Pulp And Paper Building Opened By Willingdon

(Continued from page one)

most suitable as the King's resort during his convalescence, and stated that he trusted that the balmy breezes of Sussex might restore His Majesty to health and vigour, so that he might reign over his people for many a long year.

The Governor-General closed by expressing his thanks to the association for inviting him to open the new building. Besides other reasons, he was particularly proud to be present because this enterprise showed the spirit of co-operation which had been the keynote of his first speech in Canada on his arrival at Quebec.

The Hon. Charles Stewart, Minister of the Interior expressed his opinion that too much pessimism had been in evidence in connection with the pulp and paper industry. As encouragement to the paper men, he announced that he and his colleagues in Ottawa were looking for fresh markets for surplus production, and that they were going to find them.

Dean Martin assured the Governor-General and the members of the Pulp and Paper Association of the co-operation of the University with the Association and the Government in research connected with pulp and paper.

Descending to the basement the Governor-General set the miniature paper mill in motion, thus formally opening the new Institute. The whole gathering then proceeded to the Ritz-Carlton Hotel. As His Excellency left the building he was greeted by a battery of cameras, and a crowd of students who had just finished their morning lectures. After he had been "shot", Lord Willingdon was requested by a schoolboy to sign an album, and he smilingly complied.

In his additional remarks at the luncheon, the Governor-General was brief and humorous. He stated that he had another secret reason for being interested in pulp: he had invested in the industry. Declaring that he was assured that this had been a sound investment, he asked the gathering for any further tips which would allow him to make any other investments as sound as this one.

Colonel Jones, just re-elected as President of the Association then introduced the speaker of the day, Ira A. Mackay, Dean of the Faculty of Arts. The Dean began by expressing his opinion that as Canada's future was so bound up in research, the success of this new Institute would be an index of the success of the Dominion.

"Canada is a trail," asserted the Dean. "There would be no Canada but for those two lines of steel which cross the Dominion from East to West. Thus Canada lives only in the Imperial picture, as a connecting link of the Empire and if taken out of that picture would be nothing."

It seems impossible for any two firms to agree entirely and it seems almost a more remote possibilty for seperate nations to agree. But in this matter Canada is setting an example, for she is not only a member of a federation of friendly nations, but also maintains peaceful relations between herself and her great neighbour to the South."

"But great ideals are useless if they are not put to work. And they will be put to work by sound education and honesty. There are four officers of the state: the protection of the community from danger; the administration of justice; the conduct of the great state—controlled public services; and the encouragement of education. Of these four the first three are merely negative functions, while the fourth is the most constructive and by far the most important."

"We need scientific men to seek new opportunities for research. The great problem of the day is that which attempts to solve the problem of increased wages; how to increase wages and production at the same time. There is an easy solution to this question, and that solution is the application of scientific skill and invention to the industries concerned."

"There are many factors entering into the progress of this country, but the most important of these is immigration. And in this connection we need men to study the science of communication, and others to form a reliable national policy as regards immigration.'

Returning to what he declared his favorite theme, namely education, the Dean declared that the young men of the country should be instilled with admiration for its beautiful landscapes, and also for the great English and Scottish, but mostly Scottish, adventurers and statemen who had built up this vast Dominion. "If the men of the future have as much foresight as the Fathers of Confederation, success is assured. And the way to attain that foresight is work. Vigour is the true "Idee du Canada."

At the conclusion of Dean Mackay's address, the Governor-General was forced to leave, and the luncheon was concluded with a few matters of business.

In 1912 the Forest Products Laboratories were installed in Montreal, but there was a great deal of contraction of enterprise in the industry during the war. From 1920 to 1925 the Pulp and Paper Association took an active interest in the matter, and now there are three bodies co-operating to establish the research institute: the Pulp and Paper Association, McGill University, and the Dominion Government.

STAND FOR ANYTHING

Notices

GIRLS' COLUMBIAN CLUB

Tickets for the girls' Columbian Dance are now available at the Arts Building from M. McNaught or M. Macdonell. Subscriptions must be in by January 30th. Phone UP. 4841 for information.

DELTA SIGMA EXECUTIVE

There will be an executive meeting in the Arts Common Room, Monday at 1 p.m. All members are urged to be present.

A meeting at the Presbyterian College of the Literary and Philosophical Society will be held next Monday at 8 p.m. when John Williamson, M.A. will give a lecture on Robert Burns. All students welcome.

McGILL MEDICAL SOCIETY

The next regular meeting of the Medical Society will be held on Monday, January 28th, at eight p.m. in the Assembly Hall of the Medical Building.

Programme:

1. Case Report.
2. Dr. H. C. Burgess will speak on "Medical Education. Its Mistakes and Possibilities."
3. Refreshments.

L. A. Littlefield, Secretary.

ENGLISH LITERATURE SOCIETY.

The next meeting of the English Literature Society will be held next Monday at five o'clock in the Arts Building. The speaker will be Mr. Roger Gough.

ARTS FRESHMEN PHOTOGRAPHS

All Arts Freshmen desiring class pictures must give their names and seventy-five cents (for mounted) or fifty cents (for unmounted) to Bill Sollar, who will contrive to be in Bill Gentleman's office between lectures No order can be given unless paid for in advance. Since the Freshman-Sophomore Banquet, the class executive of Arts '32 have adopted the old Spanish saying of "no tickee—no washee" as the definition of their future policy.

ROYAL ASTRONOMICAL SOCIETY

The next meeting of the Society will be held on Thursday, Jan. 31st at 8.15 p.m. in the MacDonald Physics Laboratory, McGill University.

The Secretary will show a set of moving slides of the Solar System and a series of photographs from Barnard's Atlas of Selected Regions of the Milky Way.

It is hoped that there will be a general informal discussion of recent astronomical problems in which all memgers of the society are invited to take part.

The meeting is open to the public

A meeting of the members of the Council will be held at the close of the regular meeting.

POLITICAL ECONOMY CLUB

The first meeting of the Economics club in the second term will be held Thursday, January 31 at 8.15 in the Smoking Room of the Arts Building. M. C. Herman and M. Slapack, both of Arts '29 will speak on "Migration Between United States and Canada."

HOCKEY

Coupon No. 11 will be accepted on Monday, Jan. 28th at the Forum when McGill plays U. of M.

F. W. HAMILTON,
Ticket Manager.

ATTENTION EXECUTIVES

Clubs, societies, and executive groups wishing to have their pictures featured in the Annual this year must make arrangements to have these taken as soon as possible. A receipt form for $7.00 when presented at Notman's entitles the group to a sitting. These receipt forms may be obtained from George Brown, Arts 4, or William F. Thomas Sci. 3 Kindly get in touch with the above as soon as possible.

SOCIOLOGICAL SOCIETY

The next meeting of the Sociological Society will be addressed by Dr. Paul Villard, on the subject: "The French-Canadian Attitude toward the Race Question." Tuesday evening Jan. 29th, at 8.15 in Room 30 of the Arts Building.

PLUMBER'S BALL

Tenders are called for an orchestra for the Plumber's Ball to be held on Tuesday, Feb. 12th at the Windsor Hotel. The lowest or any tender not necessarily accepted.

Address all communications to the Plumber's Ball Committee, Engineering Building.

ARTS '31

All those desiring class pictures communicate with R. H. Webster. Today is your last chance.

TRACK ATTENTION

The date of the Track Picture has been changed to Saturday, January 26, at 1 p.m. at Notman's today.

DELTA SIGMA EXECUTIVE

There will be a meeting on Monday at 1 p.m. in the Arts Common Room.

GYM CLUB

The Gym Club continue practices every Monday, Wednesday, and Friday in the Montreal High Gym.

MACCABAEAN CIRCLE

A meeting of the Maccabaean Circle will be held in Strathcona Hall on Sunday, January 27th, at 3 p.m. Speaker: Rabbi Harry J. Stern: Subject: "Jewish Life in Soviet Russia." Musical Entertainment.

R.V.C. BASKETBALL

The inter-class matches will be held as follows:

Mon. 27. 4-5.

4 vs. 3.

2 vs. 1.

The games will be played in the Convocation Hall.

ATTENTION MED. STUDENTS

The medical student who submits a drawing for the menu cover for the Medical Dinner which is accepted by the committee, will receive a free ticket for said dinner. Drawings must be handed in to Miss Mudge by February 2nd.

ROWERS—ATTENTION!

The machines are now in our quarters in the Field House. Please remove clothing from the room in the Union as soon as possible. Lockers will be supplied. Training hours—3 to 6, every day. Everybody out.

INDOOR RIFLE CLUB

The first D.C.R.A. competition of the season will be held at 2 p.m. at the Montreal High School range. All members of the club are urged to turn out.

PHARMACY
